

Poster 2.05: A survey of MIR Flares in normal Galaxies

Tingui Wang, Lin Yan, Liming Dou, Ning Jiang, Chenwei Yang, Zhengfeng Shen

systematic search for MIR flares in non-Seyfert galaxies using multi-epoch WISE archival data to constrain TDEs/nuclear flares in dusty environments.
present the sample, properties of flares and their host galaxies, event rate, various correlations.

Wang et al. MNRAS submitted

powered by brief accretion onto SMBHs
different from the known population if they are TDEs
